# Report from the 2018 Singapore Sustainability Symposium

## Cities, where Sustainability Markets and Stakeholders are Created

*Alexander J.B. Zehnder, Chair Sustainable Earth, NTU*

# Topics discussed

1. Creating Incentives and Linking Sustainability Solutions to Economic Opportunities
2. Extending the Reach of Finance for Sustainability Solutions
3. Education at All Levels to Train the Sustainability Leaders and Empower the Market Actors of Tomorrow
4. Greater Diversity and More Inclusiveness for Sustainability

# CITIES

---

Where Sustainability Markets  
and Stakeholders are Created

# Take home messages

- 1. Sustainable solutions must integrate economic perspectives.** The challenge is to find the right incentives.
- 2. A growing number of financial institutions are ready to invest into sustainable solutions with the right incentives.** Financial market instruments exist or are developing to support cities' sustainable solutions.
- 3. The incentives and motivations for sustainability must be essentially centered on empowering and enabling people and dedicated leaders.**
- 4. The cities will be the drivers for sustainability.** Their approaches must be fully inclusive (youth, gender, etc).

**A friendly and sustainable THANK YOU!**
